## **THE WEIGHT LOSS SURGERY GROUP EXTENDS AFTERCARE PROGRAMME TO THREE YEARS**

The Weight Loss Surgery Group (WLS), the leading UK bariatric surgery and aftercare provider, has today announced the extension of its post operative patient care programme to three years. This means that WLS patients can have gastric band surgery and three years aftercare in the UK for only £6195.

Wendy Stubbs, Clinical Director for WLS, said: “Weight loss surgery is not just about the procedure, patients need to be professionally assessed before the operation and receive a high standard of aftercare once any treatment has been carried out.

“We now offer the most comprehensive and competitively priced aftercare service in the UK, as we believe this is a vital part of the success of any weight loss surgery programme. We introduced our new pricing following patient assessment and feedback, which highlighted a demand for longer aftercare. Our number one goal is to see our patients through their weight loss journey from the start to a successful conclusion.”

The WLS aftercare programme ensures patients have the opportunity to get the very best from their surgery and helps change lifestyle patterns, as well as eating habits. The package includes regular reviews, unlimited band adjustments in the first two years (three in the final year ), a 24 hour emergency helpline, nutritional advice from our nutritional specialist, access to a specialist fitness advisor, as well as constant support and medical advice available in ten clinics across the UK.
